Forecast for Wednesday 29 Dec 2021

Weather: Clouding over from the early hours as frontal rain approaches the Lake District in the morning. Rain soon spreading east across the Lake District after daybreak, rain will be heavy for a time and accompanied by widespread gales making for quite miserable conditions for a time. Rain will clean east after lunch and it will begin to brighten up during the afternoon, some clearer spells are possible by late afternoon. Further clear spells will develop during the evening.

Chance of cloud free mountain/hill tops above 800m: 40% during the morning associated with the rain, improving to 80% by late afternoon as cloud clears after the rain.

Visibility: Visibility turning quite poor soon after daybreak as rain spreads across the area. General visibility will improve during the afternoon becoming very good. Low cloud will be broken during the morning from 400m and above gradually lifting and breaking during the afternoon, some patches of cloud around 600-700m by mid afternoon but otherwise becoming clear.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Significant wind chill during the morning in gales or severe gales and rain, milder air will spread across the area during the afternoon with winds easing slightly but still feeling cool until winds ease significantly overnight.

Forecast for Thursday 30 Dec 2021

Weather: Outbreaks of rain are expected during the morning especially around southwestern fells. It will become drier and brighter for more northeasterly fells. Further outbreaks of rain will spread north during the evening. A lot of lower cloud expected in the milder airstream.

Maximum wind: Southwesterly 20-30mph with gusts 30-35mph.

Chance of cloud free mountain/hill tops above 800m: 40-50% a lot of the lower cloud will be confined to southerly fells with some clear tops around the north of the National Park. It will be hard to define the clearest time of day but perhaps the afternoon.

Visibility: Moderate or poor in early outbreaks of rain, becoming mainly good during the afternoon especially in the north. Cloud bases will be broken around 400m, perhaps more scattered around 500m in the north.

Temperature: **Valleys:** Plus 11 Celsius.
At 800m: Plus 6 Celsius.
Freezing level: Above the summits.
